

Tony Cardone

Software Architect / Engineering Manager

210-880-4316 | tcardone@outlook.com | linkedin.com/in/tonycardone | tonymcardone.com

PROFESSIONAL SUMMARY

Engineering manager and architect with an extensive architecture background in microservice, monolith, and hybrid platforms. Significant experience leading international teams' implementation from requirements to delivery, mentoring team members of all levels, and cross-organization engagement with a consistent, transparent approach that draws on the experience of team members to implement a viable solution.

EXPERIENCE

Zilliant Incorporated | Austin, TX | June 2015 – November 2025

Senior Architect / Engineering Manager (2021 – 2025)

- Manager and technical lead of the seven-member architect team, which designed product solutions across Zilliant's platform, including highly available APIs and a legacy monolith application.
- Led system design of new product offering and subsequent integration of this design into existing platform from requirements to deployment.
- Technology portfolio focused on scaling and management of Java microservices with Dropwizard, Python, and PostgreSQL on Amazon Aurora, deployed to Elastic Container Service. API stack handled hundreds of requests per second across a multitenant system.
- Engaged with customer solutions teams to identify design issues within their proposed solution on monolith application, including mitigation of recurring performance issues.
- Transitioned to full-time Engineering Manager for two Eastern European-based teams, leading delivery process and oversight of day-to-day operations alongside architecture responsibilities.

Senior Technical Lead (2015 – 2021)

- Technical lead for ten-person hybrid US-Ukraine team focused primarily on critical backend features for the platform using Amazon Web Services and Salesforce offerings.
- Tasked with end-to-end delivery of software for the team, including requirements gathering, technical design, Scrum Master responsibilities, coding, test process, and release management. Releases accelerated from quarterly to daily as needed.
- Technology in focus included Java, AWS Redshift, Simple Workflow (SWF), Elastic MapReduce (EMR), EC2, and Microsoft SQL Server.

BNSF Railway Company | Fort Worth, TX | June 2013 – June 2015

Systems Developer

- Software developer on a large distributed agile development team working closely with BNSF's team of mechanical experts to deliver a predictive analytics solution to reduce derailments and increase reliability of rolling stock.

TECHNICAL SKILLS

Cloud (AWS): Aurora PostgreSQL, Redshift, Elastic Container Service, EC2, Simple Workflow, Lambda, Batch

Languages: Java, Python, R, SQL, Salesforce Apex

Technologies & Tools: SQL Server, ELK Stack, Jira, Dropwizard, PostgreSQL, APIs, Multitenancy, Docker, AI

EDUCATION

Master of Science – Data Science

Rawls College of Business, Texas Tech University, Lubbock, TX

Bachelor of Science – Computer Science

Whitacre College of Engineering, Texas Tech University, Lubbock, TX | Minor: Mathematics
